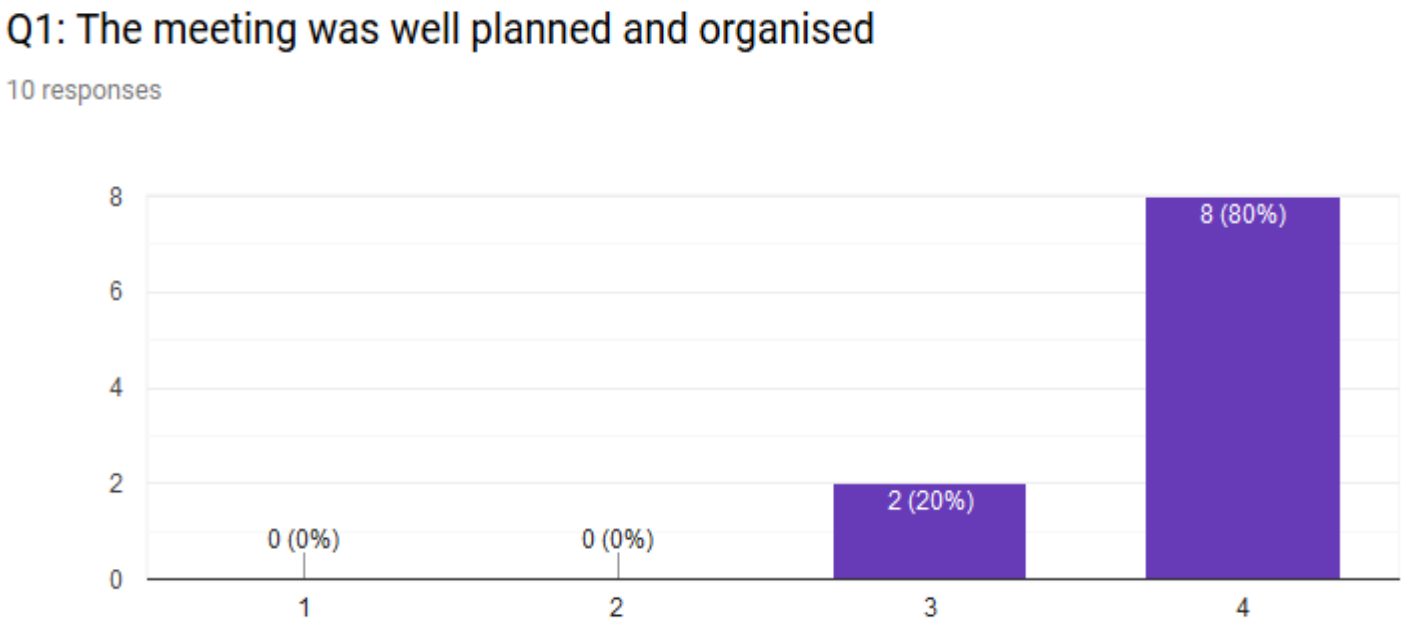
MEETING ORGANISATION



Comment :

« Cap Ulysse team was a very good host
"Very well organised."

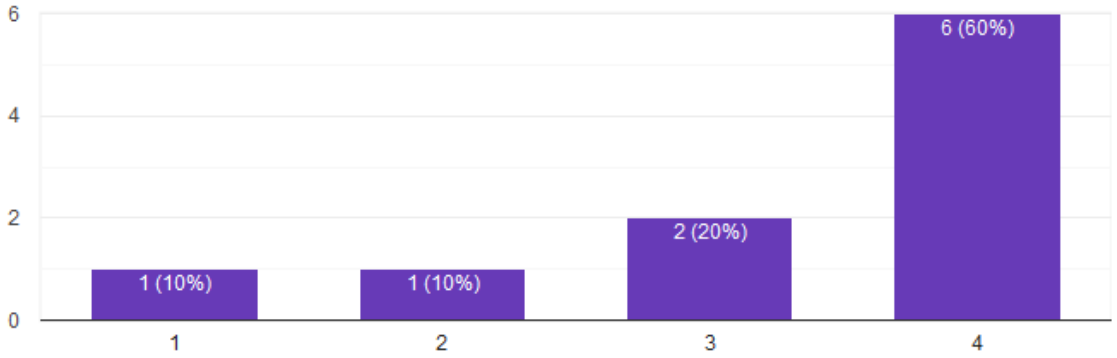
AGENDA & TIME ALLOCATION

Q2: We have spoken about time management in our meetings. Do you think this time, there was enough time to work on all topics that were announced, and mainly on sharing individual experiences of Pilot Trainings, but also other topics (mentoring, platform, management issues).

10 responses



Comments :

*… this time, **dissemination was in our attention, which was great and really necessary**.*

*My suggestion is **to consider with very strong attention the finalization of all the activities in the last 6 months** of the project, from April to September 2019, and to be very active in the reporting activities.*

*Many points were brought up to the project lead and **completely ignored or brushed aside, leading to frustration.***

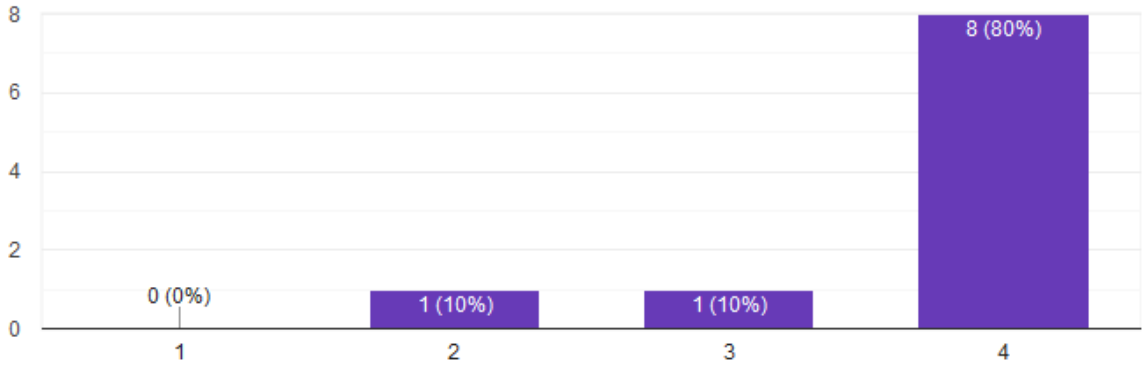
CONTRIBUTIONS & DISCUSSIONS

Q3: This meeting strongly focused on the follow--up of the Pilot Training, including the mentoring process, the platform usage and the C2 session to be organised in Vienna. All participants had the opportunity to contribute to the discussions to clarify the common vision of global expected results and individual contributions in achieving the targets.

10 responses



Comments : **Still issues to be discussed to reduce the stress related to local training set-up**

*" **All interested partners should meet online**, via skype or other way, to discuss how things should go. **It is not productive to let the technological partner bring ideas and then implement in offline in a different matter**.*

Like for Pilot Training. It was a real surprise that Partners are not using fully the platform for their training

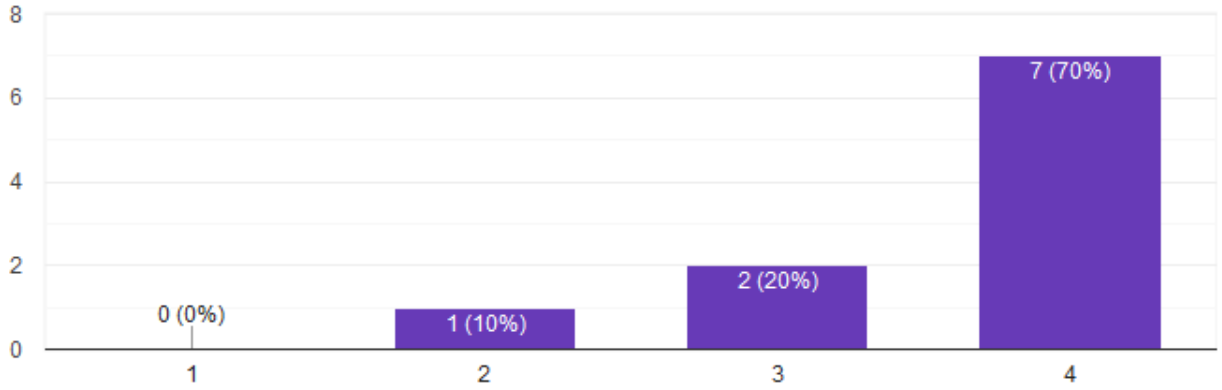
WHAT WAS EXPECTED FROM ME ?

Q4: These discussions about the expected work during pilot training and finalisation of the IO contents has helped me to understand clearly remaining tasks during Pilot Trainings, how to use the material (Training, Mentoring, IT tools).

10 responses



Comments : Still remaining stress for local training set-up

☺ *“this is the most complex activity it will need more attention and time dedicated for using the platform as it was configured now. The new Black Diamond structure needs some configuration and permisions to be made.*

☹ ***It's very important that all the partners share with the leading partner of IO5 ARTES their experiences in the pilot** and the different approaches of the experimentation that they delivered. In this way we can really finalize the output in the most enriching and complete way.*

FINAL COMMENTS

For helping the local training organisation

Local Training set-up _ the Real Common Usage of the Platform is not well accepted

☺ **I think a shared platform to work on it's a good start**.
Enforcing the methods already in use will let partners collaborate in a proficient manner.
If the platform actually worked it would be useful.

☹ **. It was a real surprise that Partners are not using fully the platform for their training.**

VERY GOOD MOTIVATION – But still some difficulties using the IT Tools for the Local Training,.

COMMENTS

Key issues related to future EYEE Results exploitation :

Sustaining the training for the future

*"I hope in the **continuing of this good experience**"*

*"We imagine a **EYEE Community alive and active in the different countries** we experimented the European project."*

*" We should **commit to continue the trainings even in school year 2019/2020**."*

*"the good result will be **if someone will found a company powered by EYEE**"*

The usage of the IT Platform

*'we would like **to use platform to make courses for teenagers**. ,'*
More digital, less blended learning
